❑ This child needs a dental home for regular checkups.

❑ This child is being referred for a specific issue:

_____

Notes:

First Tooth = First Dental Visit
Call to schedule an infant /child dentist visit

Doctors and dentists recommend you take your baby to the dentist before their first birthday.

Baby teeth are important!
- Baby teeth help your child to chew, speak, and smile
- Cavities on baby teeth can be painful
- Cavities on baby teeth can transfer to permanent teeth

Give your child a great start to a lifetime of healthy teeth by making that first appointment!
At the first check-up, the dentist will:
- Check your child for cavities or problems
- Show you how to clean your baby's teeth
- Discuss how sharing germs can cause cavities
- Discuss how your choices about sugar affect cavities
- Talk about nursing and other infant issues

Cavities on baby teeth can grow quickly!
