Why a career in oral health?

Hear from oral health professionals in Hawaii!

As a Registered Dental Hygienist, there are a million reasons to love this occupation! My top reason is having the opportunity to provide oral health screenings, education and preventive care especially in my hometown of Waipahu, a community that has supported me from the very beginning.

- Cyndie Rayoan, Dental Hygienist

I find dentistry to be rewarding as well as enjoyable! There are so many opportunities to participate in a person's well-being.

Because we see a person regularly and understand their condition, we are able to create a bond that allows us to better care for the 'whole person.' It's also nice to be considered part of a community that extends beyond the dental office."

- Dr. Lisa Valderueda, Dentist
