| <input type="checkbox"/> Nurse | <input type="checkbox"/> Other: _____ |

Please select at least one:

- ☐ This child needs a dental home for regular checkups.
- ☐ This child is being referred for a specific issue:

Notes:

First Tooth = First Dental Visit

Call to schedule an infant /child dentist visit

Doctors and dentists recommend you take your baby to the dentist before their first birthday.

Baby teeth are important!

- Baby teeth help your child to chew, speak, and smile
- Cavities on baby teeth can be painful
- Cavities on baby teeth can transfer to permanent teeth

Give your child a great start to a lifetime of healthy teeth by making that first appointment!

At the first check-up, the dentist will:

- Check your child for cavities or problems
- Show you how to clean your baby's teeth
- Discuss how sharing germs can cause cavities
- Discuss how your choices about sugar affect cavities
- Talk about nursing and other infant issues

**Cavities on baby teeth
can grow quickly!**

**To find a dentist, see
map on back**
